

EKKATI LAXMAN REDDY

laxmanreddyekkti333@gmail.com | +91 9392428259 | linkedin.com/in/laxmanreddyekkti | github.com/Laxmanredd

SKILLS

Languages: Python, Java, SQL (ANSI SQL, T-SQL, SQL Server)

Data Engineering: ETL/ELT Pipelines, dbt (transformations), Snowflake (cloud data warehouse), Azure Data Factory (concepts), SSIS (concepts), Fivetran (concepts), REST API Integration, Data Validation & Quality

Data Modelling: Dimensional Data Modelling, Star Schema, Snowflake Schema, Data Warehousing Concepts

BI & Visualisation: Microsoft Power BI, Tableau, Plotly, Streamlit, Excel, EDA, Data Preprocessing

Tools & Platforms: ChromaDB, HuggingFace, Groq API, Selenium, TestNG, Docker, Jenkins, Git/GitHub

AI/ML & Data Science: Machine Learning, NLP, LLMs, Generative AI, RAG, Prompt Engineering, Feature Engineering, Predictive Modeling, Model Evaluation

Soft Skills: Problem-Solving, Communication, Teamwork, Adaptability, Project Management, Documentation

PROJECTS

Multi-Phase AI Retrieval & Analytics System | Live ↗

Feb – Mar 2026

Python · NLP · LLMs · RAG · ChromaDB · Groq · BM25 · NetworkX · Streamlit

- Architected a 3-phase RAG pipeline (Dense → Hybrid → Graph RAG) over 500 arXiv papers, combining BM25 sparse + bi-encoder dense retrieval fused via RRF and cross-encoder reranking — achieving **Recall@5 of 0.76** and **43% MRR improvement** over single-retriever baseline across 30 evaluation benchmarks.
- Designed a Graph RAG layer using NetworkX with BFS-expanding 1-hop citation neighbours, combining graph-retrieved chunks with reranked dense results for deeper cross-paper reasoning.
- Engineered a 3-signal confidence scorer (retrieval sigmoid + LLM self-rating + chunk agreement) and a 9-chart EDA dashboard with PCA embedding projection, making the pipeline fully interpretable end-to-end.

Traffic Analysis Dashboard — ETL Pipeline & BI Reporting

Jan – Feb 2025

Python · SQL-equivalent ETL · Google Sheets API · Geoapify API · Tableau

- Built an **end-to-end ETL/ELT pipeline** integrating multiple REST APIs (Geoapify, Google Sheets) — implementing structured extraction, transformation, schema validation, and anomaly detection, **reducing manual processing effort by 80%** with zero post-deployment intervention.
- Designed and developed a **business intelligence dashboard in Tableau** visualizing route efficiency, commercial hotspots and key traffic KPIs — collected and documented user requirements, translating business needs into BI reporting specifications that contributed to a **15% increase in operational efficiency**.
- Participated in end-to-end **software development lifecycle** from requirements gathering through design, development, testing, and release — applying structured data validation and consistency checks to ensure report accuracy and data integrity.

DataGroq — AI Document Assistant | Live ↗

Sept 2025

Python · Groq API · NLP · ML · EDA · Plotly · Streamlit

- Engineered an AI-powered document analysis assistant using Groq API (LLaMA-3), enabling conversational Q&A over **200+ documents** with **~200ms response latency** and safe Python code execution for automated insight generation.
- Built end-to-end NLP pipeline covering tokenization, stopword removal, lemmatization, document classification and keyword extraction — improving analytical accuracy by **30%** and reducing manual analysis time by **70%**.

INTERNSHIP

Programmer Analyst Trainee

Jan 2026 – Present

Cognizant Technology Solutions (GenC Program)

- Integrated external **REST APIs** using REST Assured — writing and validating GET, POST, PUT, PATCH, DELETE requests with JSON/XML schema validation, status code assertions, and data-driven parameterization via CSV and JSON, gaining hands-on enterprise API integration experience.
- Participated in **software validation** through development, review, and execution of test plans and scripts — designing a fault-tolerant Selenium TestNG framework with structured exception handling and Assert-based validation covering edge cases beyond the happy path.
- Communicated with team members across Agile sprint workflows on projects, development tools, and procedures — collaborating with senior engineers on system design and iterative delivery under real production deadlines.

EDUCATION

Lovely Professional University

Phagwara, Punjab

Bachelor of Technology, Computer Science and Engineering | CGPA: 8.1

Aug 2022 – Present

Sri Chaitanya Junior College

Hyderabad, Telangana

Intermediate | 96.8%

Apr 2021 – May 2022

CERTIFICATIONS & ACHIEVEMENTS

Associate Data Practitioner Certification | Credly

Apr 2026

Associate Data Practitioner Certification | Credly

Mar 2026

Data Visualization with Tableau | Coursera

Nov 2024

Achieved 5-Star rating in SQL | HackerRank

Feb 2025

Active Open Source Contributor & Hackathon Participant
